You have just given your CPL briefing to the selected soldiers at a 10% random test. As you prepare to start your collection SGT John Doe approaches the desk and asks to self refer. You collect his specimen under IR (he was selected) and it comes back from the laboratory positive for Cocaine. Is this result covered under the Limi

Yes, it's covered

No, it's not covered

Your commander has a policy of testing all soldiers upon return from 15 or more days leave, what is the test basis and is this test covered under the Limited Use Policy?

- CO, Yes
- CO, No
- IO, Yes
- IO, No

NEXT

Check Point

That is CORRECT, Great Job !!!

Check Point

Sorry, but you are incorrect.

Limited Use Policy

- **Limited Use Policy does not apply to the following evidence: (cont)**
- **If a Soldier self refers after being notified of a urinalysis, then that test is not covered by the limited use policy.**
- **Example: CPL Snuffy smoked marijuana on Saturday night . On Monday morning the commander orders a 10% random urinalysis and CPL Snuffy is selected to provide a specimen. CPL Snuffy approaches the UPL desk and say "I want to self refer, I have a problem". This test will still be coded as an IR and is not covered by the limited use policy. After providing a specimen, CPL Snuffy would be directed to see the commander for a referral to the ASAP.**

Probable Cause (PO)

- **What is "Probable Cause"?**
  - **Exists "when there is a reasonable belief that the person, property or evidence sought is located in the place or on the person to be searched." Rules of Courts Martial (RCM) 315(f)(2).**
  - **Basically a commander must have reliable information that a soldier used a drug and the information must be given to the commander within the time frame that a particular drug can still normally be found in a persons urine that used that drug (retention time).**

Limited Use Policy

- **What is <u>Protected Evidence</u> ?**
  - **Results of a command directed competence for duty (CO) urine or alcohol test or a rehabilitation test (RO) as part of ASAP treatment plan.**
  - **A soldier's self-referral to ASAP.**
  - **Information concerning drug or alcohol abuse or possession of drugs for personal use occurring prior to a soldier's self-referral. This information is provided by the soldier as part of their initial entry into the ASAP.**

Inspections

- A commander may direct the seizure of urine, like other evidence, based upon the authority to inspect to determine the health and welfare of unit members. Such as:
  - May be 100% of unit (IU)
  - Parts of the unit based on random selection such as a monthly 10% test (IR)
  - Selected individuals based on a commanders written policy that is equitable to all Soldiers. Example: Policy of testing all Soldiers upon return from AWOL status or after 15 or more days leave are valid inspections (IO).
